

Understanding the Performance of LES Retailer

1. Finding top 10 Customers with highest transaction amount

<i>FILTERS</i>	
Customers	Top 10
Transaction	All

Transaction_id	Customer_id	Sales
31245038	712345388	\$7,762.00
31245012	712345122	\$6,880.00
31245029	712345299	\$5,510.00
31245028	712345288	\$4,698.00
31245025	712345255	\$4,451.00
31245039	712345399	\$4,029.00
31245044	712345444	\$3,991.00
31245011	712345111	\$3,979.00
31245021	712345211	\$3,932.00
31245013	712345133	\$3,092.00

Findings

1. Top Customer Contribution to Total Sales - 6%
2. Top 3 Customer Contribution to Total Sales - 20%
3. Top 10 Customer Contribution to Total Sales - 36%
4. Average Sales per Customer - \$2,590.00

Analytical Insights

1. A small group of high-value customers contributes a significant portion of total sales.
2. Further analysis of purchase frequency and average transaction value can identify what drives high customer value.

2. Product Sales for a given Period

<i>FILTERS</i>	
Time Period	Dec 8 - Dec 15
Transaction	All

Product_id	Product_Description	Sales
10000345	Cornflakes_1Kg	\$5,372.00
10000330	Orange_200mL_x6	\$5,280.00
10000328	Mango_1L	\$5,060.00
10000346	Cornflakes_almond_1Kg	\$4,992.00
10000344	Cornflakes_500g	\$4,592.00
10000349	Museli 1 Kg	\$4,256.00
10000339	Eggs_1x30	\$4,080.00
10000338	Cheese_200g_1x6	\$4,000.00
10000326	Pepsi_2L	\$3,456.00
10000331	Lemon_1L	\$2,736.00
10000348	Museli_500g	\$2,560.00
10000347	Museli_200g	\$2,303.00
10000350	Chocos_200g	\$2,077.00
10000333	Eggs_1x12	\$1,836.00
10000334	Milk_MD_1L	\$1,776.00
10000327	Pepsi_1L	\$1,720.00
10000335	Milk_Amul_1L	\$1,560.00
10000321	Soda_1L	\$1,296.00
10000340	Curd_Amul_500mL	\$1,260.00
10000332	Eggs_1x6	\$1,204.00
10000343	Curd MD_1L	\$1,188.00
10000324	Coke_1L	\$1,188.00
10000341	Curd MD_500 mL	\$1,160.00
10000329	Orange_200mL	\$1,080.00
10000342	Curd_Amul_1L	\$1,008.00
10000336	Milk_MD_500ml	\$858.00
10000322	Soda_500mL	\$780.00
10000323	Soda_200mL	\$645.00
10000325	Coke_500mL	\$540.00
10000337	Cheese_200g	\$520.00

Findings

1. Cornflakes 1Kg is the highest-selling product at \$5,372, followed by Orange 200mL x6 and Mango 1L.
2. Top 10 products contribute around 62% of total product sales.

Analytical Insights

1. Festive sales are concentrated around a few high-performing products, particularly breakfast and fruit based beverage categories.
2. These products can be prioritized for inventory planning, promotions, and festive bundles.

3.1 ARPU(Average Revenue per user) by state

<i>FILTERS</i>	
Time Period	Nov 30 - Dec 15
Transaction	All

State	Users	Sales	ARPU
Uttar Pradesh	6	\$19,405.00	\$3,234.00
Karnataka	10	\$30,347.00	\$3,035.00
Telangana	5	\$13,327.00	\$2,665.00
Delhi	7	\$18,608.00	\$2,658.00
West Bengal	3	\$7,636.00	\$2,545.00
Tamil Nadu	5	\$11,863.00	\$2,373.00
Maharashtra	14	\$28,338.00	\$2,024.00

Findings

1. Uttar Pradesh has the highest ARPU at \$3,234, followed by Karnataka at \$3,035.
2. Maharashtra has the highest customer count (14) but the lowest ARPU (\$2,024).

Analytical Insights

1. Maharashtra could be investigated for upselling/cross-selling opportunities, while the customer profile and offerings in high-ARPU states such as Uttar Pradesh could be studied for potential replication.

3.2 ARPU(Average Revenue per user) by city

FILTERS	
Time Period	Nov 30 - Dec 15
Transaction	All

City	Users	Sales	ARPU
Kanpur	3	\$11,923.00	\$3,974.00
Bangalore	8	\$25,389.00	\$3,174.00
Hyderabad	5	\$13,327.00	\$2,665.00
Delhi	7	\$18,608.00	\$2,658.00
Kolkata	3	\$7,636.00	\$2,545.00
Lucknow	3	\$7,482.00	\$2,494.00
Mysore	2	\$4,958.00	\$2,479.00
Chennai	5	\$11,863.00	\$2,373.00
Pune	4	\$9,232.00	\$2,308.00
Mumbai	10	\$19,106.00	\$1,911.00

Findings

- 1. Kanpur has the highest ARPU (\$3,974) with only 3 users, indicating strong revenue generation per customer despite a small user base.
- 2. Mumbai has the largest user base (10) but the lowest ARPU (\$1,911), suggesting that high customer volume is not translating into proportionately high revenue per customer.
- 3. Bangalore is the strongest overall revenue contributor, with 8 users generating \$25,389 in sales and a healthy ARPU of \$3,174.

Analytical Insights

- 1. There is a clear opportunity to improve monetization in high-volume cities such as Mumbai, while the customer and revenue patterns in high-ARPU cities like Kanpur and Bangalore could be analyzed to identify factors driving higher customer value.

4. Sales by Category with city level breakup

FILTERS	
Time Period	Nov 30 - Dec 15
Transaction	All

City	Cereals	Dairy	Drinks & Beverages
Bangalore	\$9,032.00	\$7,637.00	\$8,720.00
Chennai	\$4,810.00	\$2,438.00	\$4,615.00
Delhi	\$6,676.00	\$4,946.00	\$6,986.00
Hyderabad	\$5,406.00	\$2,554.00	\$5,367.00
Kanpur	\$5,320.00	\$3,794.00	\$2,809.00
Kolkata	\$3,882.00	\$1,498.00	\$2,256.00
Lucknow	\$2,604.00	\$2,990.00	\$1,888.00
Mumbai	\$6,284.00	\$7,556.00	\$5,266.00
Mysore	\$1,564.00	\$1,230.00	\$2,164.00
Pune	\$4,083.00	\$3,115.00	\$2,034.00

Findings

- 1. Bangalore leads sales across all three categories, indicating strong demand across the product portfolio.
- 2. Mumbai has the highest Dairy sales after Bangalore, showing a strong preference for Dairy products.
- 3. Drinks & Beverages outperform Dairy in most cities, indicating stronger demand for this category.
- 4. Lucknow records consistently low sales across all categories, suggesting weaker overall category performance.

Analytical Insights

- 1. High-performing cities like Bangalore and Mumbai can be studied to identify successful category and customer patterns that may be replicated in lower-performing markets.
- 2. Low sales in cities like Mysore and Lucknow warrant further analysis of market penetration, customer engagement, pricing, and product availability.
